## Announcement

### new life form examples

Wonder what some of the life forms look like?

new Chicken (baby)

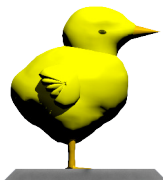

Chatdrone (baby)

Teddy (baby)

Android robot (baby)

sionChicken 2008 (baby)

Sion Zaius, grandfather of all Second Life's **breedable pets** is back.

He is bringing his newest creation and greatest achievement with him: **sionLife!**

Learn all about the marvelously complex start to what promises to become the greatest online eco system ever built.

Some of the main features of this wonderful new project are:

### features

#### Intelligence

Watch as your life forms build partnerships with each other and their owners. Fall in love with them as they grow up, mature and evolve. They enjoy playing with toys and fight for survival with other life forms.

They are happy when they see you and some will run to greet you. They naturally hunt for food without your assistance. At night, most of them gather together for sleeping and to seek the protection of older life forms.

#### Top Secret

#### Monetization

Earn L\$ and valuable points with your personal breeds. The more successful your life form is, the greater the potential is to earn points, cash and rewards.

sionLife comes with it's own **online auction system** to ensure maximum exposure and income from the sale of your pets and items.

#### Genetics

Implementation of nature-like **dominant/recessive gene types**.

sionLife genes are able to affect color, size and behaviour of life forms, giving you everything you need to create your very own lifeform.

#### 3D Movement

All sionLife pets are non physical to eliminate collision lag but still manage to skillfully maneuver themselves around obstacles.

sionLife has it's own pathfinding engine, which **allows flying, swimming or diving animals** to move. The pathfinding supplied within Second Life is not used in this incredible system.

#### Petstream

Running life forms do not lose any of the valuable information when they are removed from Second Life. Simply rez the sionLife client to wake your sionLife pet when you are ready to enjoy them again. Putting your life forms into your inventory is completely safe and can be done as often as desired.

As the project grows, you will receive new features and updates just by rezzing your pets with the newest sionLife client.

sionLife objects have a **unique core** that is independent from Second Life ensuring the project integrity is never compromised. This provides greater stability of the project and helps to preserve the value of your breeds.

#### Mind Control

Capture your pet's mind and control its actions in real time.

This is another brand new feature that will undoubtedly open extra dimensions of fun.

## **sion**Labs timeline

- 2013-** development and beta test of sionLife
- 2011-2013** an educational First Life break
- 2010** [Linden Prize 2010](#) finalist
- 2008-2009** [sionChicken](#), the first breedable lifeform in Second Life  
This famous pet triggered the Second Life breedable boom unexpectedly  
It's artificial intelligence is still unbeaten and gave birth to 26 other awesome [breedable creators](#)
- 2005-2006** Invention of protective sensor Shieldings  
The famous 'sion-Shield' was the first breakthrough of Sion Labs and initiated Second Life's protective shielding market.
